**Ministry of Health
Burnaby**

**Qualified Exercise Professional
\$65,252.73 - \$74,396.51 annually**

This is a temporary opportunity until December 31st, 2021 which may be extended or become permanent.

A great opportunity to take the next step in your career!

The Ministry of Health has overall responsibility for ensuring that quality, appropriate, cost-effective and timely health services are available to all British Columbians.

HealthLink BC's telehealth platform delivers high quality, comprehensive care and health system navigation services across the continuum of care to the public and health care providers that positively impact the health care experience.

This position practices in accordance with the standards of professional practice and code of conduct as outlined by the Canadian Society for Exercise Physiology and within the mission and values of HealthLink BC and the Primary Care Division. This position delivers client-centred physical activity information within a self-care supportive framework, advice, wayfinding, counselling, care coordination and consultative services to the public and health professionals in British Columbia. Clients may include pre-surgical candidates, children, teens and adults that have weight challenges, who are at an increased risk for developing or are currently living with chronic disease. Service channels include telephone, public and professional print resources, web, and email.

Qualifications for this role include:

- Undergraduate degree in Exercise Science (e.g. Bachelor of Kinesiology) or equivalent or in a related field from an accredited post-secondary institution.
- Certified Exercise Physiologist in good standing with the Canadian Society for Exercise Physiology. Additional certification or training related to exercise science, chronic disease management or behavioural counselling is preferred.
- Minimum of three (3) or more years of recent relevant experience as a certified exercise physiologist.

Recent (within last 3 years) relevant experience includes:

- Work experience in physical activity related education and behavioural counselling acquired in a variety of settings.
- Experience in critical appraisal of the scientific literature and ability to synthesize, interpret and integrate evidence into decision making and practice.
- Experience developing professional practice guidelines and consumer education resources.
- Experience in the use of relevant software (i.e. electronic health records, exercise program software, MS Office).
- Experience managing assignments and / or project components in a multi-faceted environment.
